Weekly Student Spotlight

March 4, 2014

Spine and head injuries, strains, and sprains are the most common injuries related to recreational activities. The winter season offers an array of sports, such as skiing, ice skating, snowboarding, and snowmobiling. To prevent injuries, it is important to wear the proper protective gear, including helmets, goggles, and padding. Layer your clothing to accommodate constant body temperature changes. Always participate in a winter sport with a buddy, never by yourself.

Stay well.

If you will be out for a while, make sure you're prepared with enough food, water, and warm clothing. Layer your clothing to accommodate constant body temperature changes. Wear the proper protective gear for the activity, especially head protection. Always participate in a winter sport with a buddy, never by yourself.

Characteristics:

- Strong
- Hardworking
- Inquisitive
- Knowledgeable
- Passionate
- Confident

.......
