Newmont is Comin' to Town

Now that we are all getting back into the swing of things, we want to remind everyone of the great opportunities internships afford each of us. We will keep you up-to-date on when the info sessions and interviews are being held through these newsletters. We encourage each of you to do your best to interview with each company that comes out. As companies come to the U of U and find willing and competent future engineers they will be more likely to continue to come back year after year to give our fellow and future students internship opportunities.

Olan Nielson

- Mining Engineering Apparel for Sale

Student Spotlight

Daniel Farnsworth

My name is Daniel Farnsworth. I am 6’7” tall and I am from Mesa, Arizona. I was the youngest of 5 boys, the oldest graduated from the U of U’s law program. I love to play all kinds of sports (including basketball). I have my own business specializing in salon shears for hair stylists that I have had for the last 3 years. Any other questions just ask me!

Justin Lawrimore

I was born and raised in Las Vegas. I grew up around heavy equipment, my family owned our own company for many years until the economic downturn in 2006. I spent the last 15 years of my life in sand and gravel. I returned back to school when the economy continued to dwindle with little hope of recovery. Last year I moved to Salt Lake and continued with civil engineering until this semester. I switched majors to mining in order to fulfill many interests and personal goals that I have set for myself.

Welcome Back BBQ

As you can see Samantha Davis gives our BBQ a big thumbs up and so do we! Thanks to the Mining Engineering Alumni Association for sponsoring our Welcome Back BBQ.
